Question #501

Which of the following is the primary purpose of an SOC 3 report?

- A. HIPAA compliance
- B. Absolute assurances
- C. Seal of approval
- D. Compliance with PCI/DSS

Answer: C
The SOC 3 report is more of an attestation than a full evaluation of controls associated with a service provider.

Question #502

Which of the following is not an example of a highly regulated environment?

- A. Financial services
- B. Healthcare
- C. Public companies
- D. Wholesale or distribution

Answer: D
Wholesalers or distributors are generally not regulated, although the products they sell may be.

Question #503

Which of the following methods of addressing risk is most associated with insurance?

- A. Mitigation
- B. Transference
- C. Avoidance
- D. Acceptance

Answer: B
Avoidance halts the business process, mitigation entails using controls to reduce risk, acceptance involves taking on the risk, and transference usually involves insurance.

Question #504

Legal controls refer to which of the following?

- A. ISO 27001
- B. PCI DSS
- C. NIST 800-53r4
- D. Controls designed to comply with laws and regulations related to the cloud environment

Answer: D
Legal controls are those controls that are designed to comply with laws and regulations whether they be local or international.

Question #505

Which of the following best describes a cloud carrier?

- A. The intermediary who provides connectivity and transport of cloud providers and cloud consumers
- B. A person or entity responsible for making a cloud service available to consumers
- C. The person or entity responsible for transporting data across the Internet
- D. The person or entity responsible for keeping cloud services running for customers

Answer: A
A cloud carrier is the intermediary who provides connectivity and transport of cloud services between cloud providers and cloud customers.

Question #506

Gap analysis is performed for what reason?

- A. To begin the benchmarking process
- B. To assure proper accounting practices are being used
- C. To provide assurances to cloud customers
- D. To ensure all controls are in place and working properly

Answer: A
The primary purpose of the gap analysis is to begin the benchmarking process against risk and security standards and frameworks.

Question #507

Which of the following frameworks focuses specifically on design implementation and management?

- A. ISO 31000:2009
- B. ISO 27017
- C. NIST 800-92
- D. HIPAA

Answer: A
ISO 31000:2009 specifically focuses on design implementation and management. HIPAA refers to health care regulations, NIST 800-92 is about log management, and ISO 27017 is about cloud specific security controls.

Question #508

Which of the following report is most aligned with financial control audits?

- A. SSAE 16
- B. SOC 2
- C. SOC 1
- D. SOC 3

Answer: C
The SOC 1 report focuses primarily on controls associated with financial services. While IT controls are certainly part of most accounting systems today, the focus is on the controls around those financial systems.

Question #509

Which of the following is not a risk management framework?

- A. COBIT
- B. Hex GBL
- C. ISO 31000:2009
- D. NIST SP 800-37

Answer: B

Hex GBL is a reference to a computer part in Terry Pratchett's fictional Discworld universe. The rest are not.

Question #510

Limits for resource utilization can be set at different levels within a cloud environment to ensure that no particular entity can consume a level of resources that impacts other cloud customers.
Which of the following is NOT a unit covered by limits?

- A. Hypervisor
- B. Cloud customer
- C. Virtual machine
- D. Service

Answer: A

The hypervisor level, as a backend cloud infrastructure component, is not a unit where limits may be applied to control resource utilization. Limits can be placed at the service, virtual machine, and cloud customer levels within a cloud environment.

Question #511

Which of the following is the dominant driver behind the regulations to which a system or application must adhere?

- A. Data source
- B. Locality
- C. Contract
- D. SLA

Answer: B

The locality--or physical location and jurisdiction where the system or data resides--is the dominant driver of regulations. This may be based on the type of data contained within the application or the way in which the data is used. The contract and SLA both articulate requirements for regulatory compliance and the responsibilities for the cloud provider and cloud customer, but neither artifact defines the actual requirements. Instead, the contract and SLA merely form the official documentation between the cloud provider and cloud customer. The source of the data may place contractual requirements or best practice guidelines on its usage, but ultimately jurisdiction has legal force and greater authority.

Question #512

When using a SaaS solution, what is the capability provided to the customer?

- A. To use the provider's applications running on a cloud infrastructure. The applications are accessible from various client devices through either a thin client interface, such as a web browser (for example, web-based email), or a program interface. The consumer does manage or control the underlying cloud infrastructure, including network, servers, operating systems, storage, or even individual application capabilities, with the possible exception of limited user- specific application configuration settings.
- B. To use the consumer's applications running on a cloud infrastructure. The applications are accessible from various client devices through either a thin client interface, such as a web browser (for example, web-based email), or a program interface. The consumer does not manage or control the underlying cloud infrastructure, including network, servers, operating systems, storage, or even individual application capabilities, with the possible exception of limited user- specific application configuration settings.
- C. To use the consumer's applications running on a cloud infrastructure. The applications are accessible from various client devices through either a thin client interface, such as a web browser (for example, web-based email), or a program interface. The consumer does manage or control the underlying cloud infrastructure, including network, servers, operating systems, storage, or even individual application capabilities, with the possible exception of limited user- specific application configuration settings.
- D. To use the provider's applications running on a cloud infrastructure. The applications are accessible from various client devices through either a thin client interface, such as a web browser (for example, web-based

email), or a program interface. The consumer does not manage or control the underlying cloud infrastructure, including network, servers, operating systems, storage, or even individual application capabilities, with the possible exception of limited user- specific application configuration settings.

Answer: D

According to "The NIST Definition of Cloud Computing," in SaaS, "The capability provided to the consumer is to use the provider's applications running on a cloud infrastructure. The applications are accessible from various client devices through either a thin client interface, such as a web browser (e.g., web-based e-mail), or a program interface. The consumer does not manage or control the underlying cloud infrastructure including network, servers, operating systems, storage, or even individual application capabilities, with the possible exception of limited user-specific application configuration settings."

KILLEXAMS.COM

Killexams.com is a leading online platform specializing in high-quality certification exam preparation. Offering a robust suite of tools, including MCQs, practice tests, and advanced test engines, Killexams.com empowers candidates to excel in their certification exams. Discover the key features that make Killexams.com the go-to choice for exam success.

Find Exam
Search your required exam

Exam Questions:

Killexams.com provides exam questions that are experienced in test centers. These questions are updated regularly to ensure they are up-to-date and relevant to the latest exam syllabus. By studying these questions, candidates can familiarize themselves with the content and format of the real exam.

Exam MCQs:

Killexams.com offers exam MCQs in PDF format. These questions contain a comprehensive collection of questions and answers that cover the exam topics. By using these MCQs, candidate can enhance their knowledge and improve their chances of success in the certification exam.

Practice Test:

Killexams.com provides practice test through their desktop test engine and online test engine. These practice tests simulate the real exam environment and help candidates assess their readiness for the actual exam. The practice test cover a wide range of questions and enable candidates to identify their strengths and weaknesses.

Guaranteed Success:

Killexams.com offers a success guarantee with the exam MCQs. Killexams claim that by using this materials, candidates will pass their exams on the first attempt or they will get refund for the purchase price. This guarantee provides assurance and confidence to individuals preparing for certification exam.

Updated Contents:

Killexams.com regularly updates its question bank of MCQs to ensure that they are current and reflect the latest changes in the exam syllabus. This helps candidates stay up-to-date with the exam content and increases their chances of success.
